

## WOODLAND WORKING PARTY

**We are looking for volunteers working in a group to assist with preparation work and heavy duty building for the start-up of woodland community space.**

To ensure that the woodland is safe and managed for the long term benefit of the community, CEP wants to create a working party which will support the sites development. Some of this will involve working with students, alongside Tutors in small groups.

Due to Anti-social behaviour and threat of theft, we also have time allocated projects.

There are many areas for volunteers to become involved such as:

- Planting and Pruning
- Nursery and Garden food production
- Renovation of Existing Buildings
- Drainage and Pathway Maintenance
- Wildlife Conservation
- Education and Information Signage
- General Woodland Management

### **CEP will support staff and volunteers with:**

Internal and external training opportunities

DBS and safeguarding training

Volunteer supervision sessions
